

# ECO Schools Homework Challenge

As part of our ECO work during November you are challenged to come up with an original and creative ECO code for our school.

An ECO code is a guide to help us remember how to look after our school environment. Below is an example of an ECO code from another school.

Some schools use acrostic poems, others use pictures. Some schools use rhyming poems to help them remember. Try to use catchy phrases which are easy to recall. To save paper, complete your design on the back of this flyer.

Hand your ECO code to your teacher by **Tuesday 10<sup>th</sup> November** to be in with a chance of winning.

The best entry from each class will be included in the final with the ECO group deciding which should be chosen as the new school ECO code!

Good luck!
