

**BUILDING ON THE PAST and
LOOKING FORWARD TO THE FUTURE**

**KUJENGA JUU YA YALIYOPITA
NA KUTAZAMA MBELE KWA
YANAYOKUJA**

A SUMMARY of the GLOBAL VISION agreed by
16,000 young people in Scotland and Tanzania

We, the young people of Scotland and Tanzania,
pledge to build a better future:

Where everyone has access to healthcare and
everyone has enough to eat.

Where our environment is clean and our climate
is stable.

Where we all receive a decent education and we
can all find meaningful employment.

Where our economy is based on fair trade and
we can all enjoy equal opportunities.

Where our government is open and democratic.

Where we all live in peace and are free from the
fear of violence.

Where we respect our cultures and traditions
and celebrate our rich diversity.

Together we will build a better future,
shared as equals, hand in hand.

Twende pamoja, Let us walk together

HUMAN RIGHTS / HAKI ZA BINADAMU

We look forward to a world free from racial, social and religious discrimination; where we all live in peace and are free from the fear of violence.

We believe that everyone must understand their rights and work for justice and equality. We know that peace and justice can only be brought about through co-operation and solidarity.

We would like all people to be free from the threat of capital punishment and that the human rights of everyone are respected.

We seek sexual equality across the world with the same opportunities provided to all people. We would like to see the responsibilities and roles of men and women at home and in the community shared fairly.

We believe that everyone in the world should have access to clean running water and electricity.

We believe that people should continue to be respectful to each other and each other's possessions.

GOVERNMENT / SERIKALI

We believe that elections in both our countries should be kept open and fair and that democracy should operate freely and properly.

We believe that there must be an end to corruption and that strict laws and regulations should operate within our systems of government.

We believe the continuing development of infrastructure and communications in our countries will improve the quality of our lives.

THE ECONOMY / UCHUMI

We see the effects of an unfair distribution of wealth in our countries and how this injustice creates unnecessary difficulties for the people around us. We would like to see a just minimum wage so that workers profit from their hard work and benefit from the natural wealth of their own countries.

We believe in Fair Trade between countries and businesses and a market based on equal opportunities. No country should benefit at the expense of another, but all should

work together and share improvements in science and technology.

We seek the development of new and prosperous towns and cities and the regeneration of those that already exist. Encouragement and support is essential for new investors and businesses.

EDUCATION / ELIMU

We understand that there is a need for education for all people in order that we may develop our world in the right way. We understand that through studying well at school and beyond we can help eradicate poverty and injustice in our countries.

Governments should recognize and honour the rights of all human beings to receive a good education and should work together to improve education globally.

We believe that the best facilities should be provided in all schools, colleges, universities and all other educational institutions. Young people should not be held back in their studies by the lack of any necessary learning resources.

EMPLOYMENT / AJIRA

We believe that appropriate opportunities and support should be available to help young people make the transition from education to employment. We believe we should work together globally to solve problems of unemployment.

THE ENVIRONMENT/ MAZINGIRA

We understand that pollution is a problem in Tanzania and Scotland and one that the whole planet faces. We recognise the effects of global warming.

We hope that the natural environment that surrounds our places of learning and wider communities will be preserved for those who follow us.

We believe that all animals should be treated with respect.

We believe that by sharing an education about the environment, recycling and planting more trees we can preserve the world of our ancestors for our successors.

HEALTH / AFYA

We would like to live in a world free from hunger and disease. We believe the provision of health care is a basic human right.

Health education is essential to make people aware of wise choices and decisions about personal and family health issues.

We understand how sexual diseases have an effect on families and communities in both Tanzania and Scotland. We recognise a need for education in relationships within and outwith our places of learning.

We believe that the abuse of drugs and alcohol are problems in both our countries and across the world.

LIFE AND CULTURE / MAISHA NA TAMADUNI

We feel that our cultures should continue to keep their traditions alive, including local and traditional music.

We believe that good and open relationships with our family and friends and community are essential.

We believe that by trusting the goodness in others we can work together to create a better world. We are mindful that by using our many gifts and talents we can achieve great things.

We believe that the relationship shared between Tanzania and Scotland is important and hope that it will continue to prosper and grow. We hope that Tanzania and Scotland will continue to flourish as beautiful, peaceful and united countries.
